

Department of Public Works

The **Spring Chipping Program** will commence the week of March 16, 2009. The town will be divided into five (5) sections and each section will have a pick-up on the **First Day** of the scheduled week for that area.

All brush must be out for pick-up on the **First Day** of the scheduled week for the section. **Absolutely** no brush will be collected once a section is completed. Residents are advised that there will be **one** pick-up per household. There are **No Exceptions** to the published schedule.

Brush should be placed in neat piles at curbside with the large diameter cut-ends towards the street. The largest size branches shall be limited to four (4) inches in diameter. Short branches under two (2) feet in length will not be accepted. Lumber, building materials, leaves, roots, stumps, briars, vines, decayed branches or other debris which can damage the chipper will not be accepted. Material of this nature will be left for your disposal. Residents are advised to place at curbside **only** the wood items listed above. There have been instances where metal items such as posts, wire and metal bands were found mixed with brush. This can cause severe injury to employees and damage to equipment. Should metal be found, the pile will be rejected.

Residents should note that the 2009 Spring Chipping Program will begin in **Section #3** and terminate in **Section #2**. Branches should be placed at curbside prior to the first scheduled date of pick-up.
